-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 September 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato et al. (US 6,118,951).

Kato et al. disclose a mouth member, for example the neck of the bottle near outlet (23) shown in figure 5, a shutter member (7a), and a member (15) attached to shutter member (7a) and configured to move the shutter member (7a) between an open position and a closed position. Also shown in figure 5, all components of the shutter and of the member attached to the shutter member are provided completely outside of the mouth member, and developer outlet (23) is formed at an angle to the direction of gravity.

Regarding claim 28, figure 2 shows an image carrier (131) and a developing device (106).

### ***Response to Arguments***

Applicant's arguments, p. 10, regarding claims 27 and 28 with respect to Saito, are persuasive.

Applicant's arguments, pp. 10-11, regarding claims 27 and 28 with respect to Kato et al. are not persuasive. Applicant submits even though Kato et al. show the shutter (7a) and attached member (15) completely outside of mouth (23) in figure 5 when the

Art Unit: 2852

container is opened, figure 4 shows a state when the container is close, in which shutter (7a) is not completely outside the mouth (23). Applicant's position is that Kato et al. does not disclose a shutter member provided completely outside of the mouth member because sometimes, as in figure 4, the shutter is provided inside the mouth member. However, figure 5, taken alone, reads on all of the limitations of the claims.

***Allowable Subject Matter***

Claims 13, 15, 16, 19, 20, 22, 24-26, and 31-33 are allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
